Travelling with Elnagh

Traveling from more than 66 years

For 66 years, Elnagh has been creating, innovating and redesigning the concept of movement. From the flexible fork for motor driven bicycles to the motorome, Elnagh expresses all its exquisitely Milanese ingenuity with the same creativity that characterizes fabrics from the Eden of fashion. Elaborate words are no longer needed to describe it because each of its products contains everything that has always distinguished the brand and its history: inventiveness, determination and engineering. Thank to its youthful inventors, skilled artisans, project technicians and designers, Elnagh is a company one step ahead of the game, offering elegant and functional solution with an attention to detail that only solid experience can offer.

Comfort for all environments

Always comfortable, above all on holiday

Relax **BEDROOM AREA**

Resting on large, comfy beds, with width up to 160 cm

Listening to my favourite music through the sound system

Reading or watching TV in comfort, thanks to the reclining headboards (T-Loft 531/Magnum 531)

Charging my devices at any time thanks to the USB port

Privacy **BATHROOM AREA**

A large, comfortable shower with size up to 70x70 cm

An environment that adapts to my needs, thanks to ergonomic systems

A bathroom tailored to me, thanks to the new system of modular doors

A bathroom with lots of light without giving up my privacy thanks to the blind system built into the window

Practicality **LIVING AREA**

More space to put things thanks to the extra retractable shelf

Optimisation of interior space thanks to the shelf

Removable rack with two shelves under the Kitchen

Storage of bulky objects in the floor hatch in front of the kitchen

CHOOSE YOUR HEATING

Winter travel doesn't bother me

Air heating

Baron/ T-Loft / Magnum

Truma Combi is Europe's most compact heating, fuelled by gas (Baron) or diesel (T-Loft/Magnum) with the option of additional electric heating (OPT.) FrostControl comes as standard, the current-free drain/safety valve for frost control.

Water heating

T-Loft 531 / Magnum 531

The Alde central heating system works on the same principle as a modern home. Quality heating. Convectors and radiators along the outer walls, and pipes in floor, heat up the air, which in turn heats up the furniture and surfaces. The rising, warm air forms a barrier in front of the windows,

Winter solutions

Floor heating

FLOOR HEATING

In combination with the heating it offers more greater interior comfort thanks to the use of self-regulating cables or heating films (OPT where available)

DASHBOARD PROTECTION Greater protection against cold draughts inside the passenger compartment. (Optional)

WINDSHIELD EXTERNAL BLIND Greater windshield protection against cold/heat (Optional)

HEATED WINDSHIELD

Windshield with double function: defroster in winter season and solar heat protection during the summer. (Optional Magnum)

ISOLATED WASTE WATER tank and exhaust valve with anti-freezing resistor (Optional)

INSULATED STEP Greater floor insulation, more efficient protection against the cold (Optional)

BODY PROTECTION SYSTEM

The best in all conditions

1

Total absence of wood

5

Total waterproofing and higher heat insulation

2

Lighter and more resistant structure thanks to the use of bi-composite thermosetting resins

4

Highest torsion resistance and more stability

3

Higher wear resistance and easy maintenance

BARON 22

BARON 22

BARON 22

The masses indicated in this catalogue refer to the provisions of European Directive 2007/46/EC.

MASS IN RUNNING ORDER

It includes the weight of the empty BASE vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and a gas tank for living purposes (20 kg).

The mass in running order, and consequently the payload and/or certified seats may vary depending on the accessories installed.

PAYLOAD

This consists of the difference between the maximum technically permissible laden mass and the mass in running order. It includes elements for living purposes, the transported passengers defined by the manufacturer (driver excluded), and the personal effects.

The payload calculation is based on the following parameters: 75 kg for each passenger (driver excluded), 10 kg of baggage for each passenger and for the driver, 10 kg for each metre of length of the vehicle, plus the remaining payload, which can be used for the installation of accessories or for additional baggage.

All masses and loads of the empty vehicle have a tolerance of +/- 5%, in compliance with Directive 2007/46/EC.

Any optional equipment increases the mass in running order and decreases the payload.

The weight of non-standard accessories is not included in the mass in running order indicated in this catalogue.

Additional accessories and devices reduce the payload by a quantity equal to their weight; the incidence of the weight of the individual accessories is shown in the special column in the technical data sheets or can be requested at our dealers.

In case certain accessories are installed (for example, additional elements such as coupling device or motorbike rack), the mass of these accessories will affect the payload, possibly reducing it along with the number of certified seats.

Please make sure that the maximum loads on the axles and the maximum technically permissible load mass are not exceeded during the complete loading phase of the vehicle.

The regulations and requirements of each country may entail changes in the characteristics of this table.

The number of certified seats may vary depending on the traffic regulations in force in each country.

NOTES

SEA S.P.A. – ELNAGH reserves itself the right to change the characteristics and the furnishings of all its models with no advance notice required; all data contained in this leaflet must therefore be considered approximate and non-binding.

Despite thorough checks of the contents, we cannot exclude possible printing and/or translating errors.

This catalogue does not constitute contractual documentation. Any reproduction, including in part, of the test or of the content of this document is prohibited.

The indicated weights are exclusively approximated. Tolerances of +/- 5 % are allowed.

Generally speaking, special equipment and options increase the no-load weight and entail a reduction in the payload.

We hereby decline any and all responsibility in case structural changes are made to the vehicle; any assembly, disassembly or changes carried out by unauthorised workshops may jeopardise your safety and cause the warranty clauses to be forfeited.

For additional information on installation and technical details, please contact one of our dealers.
