E-VAN TREND

E-VAN PREMIUM

Before telling a story, Elnagh tells its vision, a point of view on the future that began when no one was talking about aesthetics, design and made in Italy.

Every project is function and emotion, every detail is research and awareness: this is the sense of creating for Elnagh, drawing a movement of ideas around the journey.

Elnagh is the brand for those looking for practical, functional solutions for their travel. It offers a complete range of models and types.

Historic ranges with a long tradition, recognised and recognisable, which are never old fashioned.

ELNAGH IS AN INTEGRAL PART OF THE HISTORY OF THE ENTIRE RECREATIONAL VEHICLE INDUSTRY WITH 70 YEARS OF ACTIVITY BEHIND IT

WHY CHOOSE ELNAGH

Specialisation, solidity and strength

70 years of experience that together with the competence of the production team, offer a vehicle that lasts over time.

Functional spaces and attention to comfort

Vehicles that always associate attention to construction technologies with a sensitivity for living comfort.

The reliability of a well-built vehicle

10-year guarantee against infiltration, high-performance materials and state-of-the-art manufacturing processes.

E-VAN

THE BEGINNING OF
THE ADVENTURE

DESIGNED FOR THOSE IN SEARCH OF UNIQUE EXPERIENCES

If you are looking for your first van and you want a solid vehicle, with a simple, practical and essential style but with everything you need to be for your adventures, E-Van is for you.

Five are the choices available:

E-Van K2 of 5.41 m - the most compact in the range - only 5.41-m long with rear double bed

E-Van 2 of 5.99 m with transverse bed at the back

E-Van 5 of the same length, provides two bunk double beds placed at the back

E-Van 6 - the vehicle under 6 meters long (5.99 m) with twin beds

E-Van Duo, the longest in the range, which offers comfortable twin beds in 6.36 m.

**Rear door curtains not available on E-Van K2

VAN IN WINTER

Cold winter is no longer a problem on board your Elnagh E-Van!

Grade 3

Norma EN 1646-1
Thermal • Insulation • Heating

**Grade 3
with and without the
Panoramic Roof!**

Enjoy your adventures in the most extreme conditions!

Choice of gas or oil heating, combined or electric, 4 or 6 kW. Elnagh tested its Trend and Premium vans in a climate chamber based on the EN 1646-1 standard, according to which a vehicle placed at -15°C must reach an internal temperature of 20°C within 4 hours after the heating systems have been switched on. The Trend and Premium E-Van, even in the configuration with a panoramic roof, achieved a "grade 3" performance.

INSULATION

Excellent thermal and acoustic insulation in all seasons

10 YEAR GUARANTEE
BODY PROTECTION

**More insulation,
More protection
Less noise**

10-year warranty AGAINST
INFILTRATIONS

E-Van insulation

The insulation in E-Van is obtained by means of polyurethane foam which is spray-applied in the areas of the interior side walls most subject to thermal bridges. This material is resistant, functional and its purpose: today it represents the best insulating solution in thickness, cost and performance ratio. The floor is made of a sandwich panel and the roof is insulated with polyester fibre covered with aluminium film.

E-Van Trend and E-Van Premium insulation

High performance materials, full coverage and no thermal bridges. The covering of the roof, walls, crossbars and uprights is made entirely of polyester fibre covered with aluminium film, manufactured in two thicknesses (20 mm and 10 mm) to ensure its fitting everywhere, even in cavities. The uniformity of the covering keeps the internal temperature constant. della copertura mantiene la temperatura interna costante.

Tested soundproofing

- The external noise tests (using a calibrated sound level meter certified by the SIT centre) also showed that the noise perceived inside the van in the rain is 37% lower in the dinette area and 30% lower at the back. Tests in a climate chamber according to EN 1646-1, whereby a vehicle placed at -15°C must reach +20°C in 4 hours, have shown that the BPS insulation:
- reduces the time to reach pleasant temperatures inside the vehicle by 50%, even when starting from extremely cold conditions;
- increases the uniformity of temperature inside the various areas of the van by more than 65%
- maintains temperatures with greater consistency and longer for more comfortable stay.

Body Protection System

The unique technology for insulating the interior of the van from outside temperatures and noise provides thermal insulation due to the absence of thermal bridges to the outside and acoustic insulation.

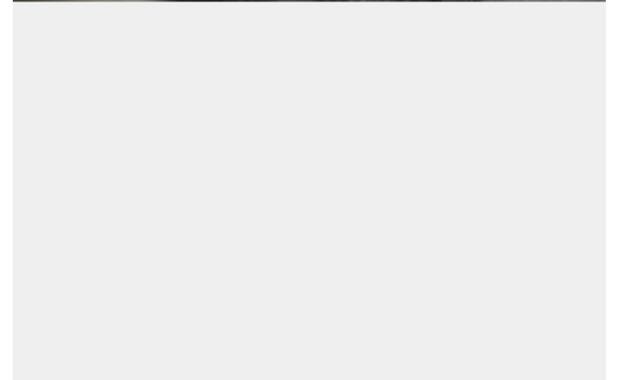

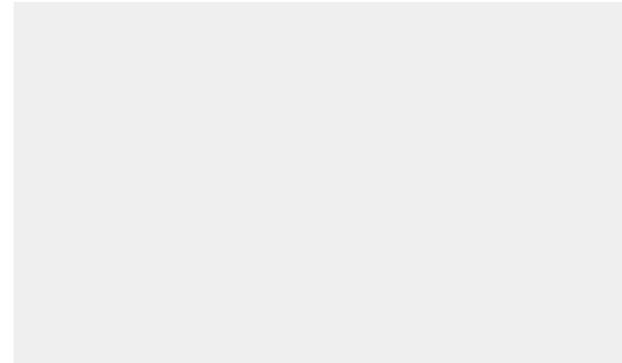

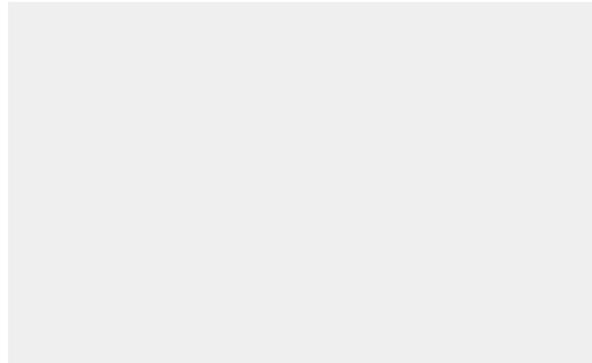

RAISING RETRACTABLE ROOF

Two extra beds and the possibility to use the rear of the van as storage space

- 200x130 cm
- LED spotlights and storage pocket
- Side windows that can be opened and closed from the inside
- Flyscreen
- Compatible with the panoramic roof
- Excellent thermal insulation

PANORAMIC ROOF*

An even brighter, comfortable and pleasant living area. The panoramic roof is available as an option on models in the E-Van Trend and E-Van Premium ranges.

RESISTANT, SOLID, DURABLE

The panoramic roof is the ideal solution for those who want an even brighter, comfortable and pleasant living area.

It is formed by an external frame in black methacrylate and internal glazing in laminated glass with sun-proof screen printing perimeter. The panoramic roof is available as an option on models in the E-Van Trend and E-Van Premium ranges.

TESTED IN CLIMATE CHAMBER

CLIMATE CHAMBER TEST
FROM -15°C TO 40°C.

HEAT RADIATION TEST
ON THE PANORAMIC ROOF SURFACE AT 65°C; 75°C; 80°C; 85°C.

LOW TEMPERATURE TEST
(FREEZING TEST -15°C) TO CHECK FOR POSSIBLE ICE FORMATION IN THE PERIMETER OF THE GLASS AND ANY DAMAGE OR MALFUNCTION.

VIBRATION TEST
WITH SIMULATION OF 820 KM ON SPECIAL ROUTE (COBBLESTONES).

INFILTRATION TEST
CARRIED OUT DURING LOW TEMPERATURE AND VIBRATION TESTS.

VISUAL CHECK
TO IDENTIFY ANY DAMAGE OR DEFORMATION IN THE PANORAMIC ROOF SURFACES

*Is also combinable to the raising retractable roof

CHASSIS FIAT

Created from the continuous cooperation with manufactures, Fiat Ducato is the perfect combination of chassis and living unit. There are many presettings to facilitate the transformation, a specific electrical system and a cab designed with reinforced uprights and pre-cut roof.

FIAT Ducato 2.200 cc EURO 6D

120 HP

140 HP

180 HP

FIAT

STANDARD EQUIPMENT

DASHBOARD

Ducato offers a brand dashboard:

- Comfortable & User friendly
- White Backlighting, extended to every single command

ELECTRIC POWER STEERING SYSTEM

Electric power steering system on whole range:

- Power supply technology adapts steering effort to vehicle speed
- Increased steering precision
- Higher driving pleasure, while reduces effort during parking maneuvers
- Improves fuel consumption and reduce CO2 emissions thanks to the adaptive energy consumption Keep current steering ratio

STEERING WHEEL AND GEAR LEVERS

- Car-like design - three spoke style
- The gear lever is more ergonomic and rounded, with an elegant glossy finish.

ESC: Electronic Stability Control – UPDATE

- CROSS WIND ASSIST. Through the use of brakes, intervenes to help stabilize the vehicle through strong crosswinds, helping to keep the vehicle from drifting out of its lane.
- TRAILER STABILITY CONTROL SYSTEM. Detects when a trailer is starting to oscillate and corrects any dangerous trailer swing, through a combination of either torque reduction and/or individual wheel braking.
- POST COLLISION BRAKING SYSTEM. Intervenes in the event of an accident, automatically applying brakes to prevent secondary potential collisions.

CRUISE CONTROL for complete relaxation at the wheel, the speed is constant and the foot is free to move. Includes Speed limiter, which prevents you from exceeding the set maximum speed.

ECOPACK consisting of: - Start and Stop system: for reduced fuel consumption. Automatically restarts at the touch of the accelerator pedal - Smart alternator: intelligent alternator that provides only the energy needed - Electronic fuel pump: for energy saving and high fuel efficiency.

MANUAL CAB CLIMATE control enhanced and diffused ventilation to the entire cab.

QUALITY AND TEST

Because we know that satisfying our customers depends greatly on the quality of our products.

Elnagh puts its own experience and expertise at the service of every van produced and follows it throughout the production stage with inspections and tests from design to delivery that meet European standards.

The same quality standards are demanded of suppliers: for the most strategic components, a check is carried out when the material is received and before it is used in production.

Check of operation and correct installation of the electrical systems.

Test on operation of the gas pipes.

Correct installation of the hydraulic systems.

Specific testing in climatic chamber to check the resistance, duration and performance of the materials selected at extremely high/low temperatures.

Performance tests on the components used. Durability of materials, resistance to stress, reliability and compliance with European regulations in the design of the seatbelt unit.

NOTES

ELNAGH reserves itself the right to change the characteristics and the furnishings of all its models with no advance notice required; all data contained in this leaflet must therefore be considered approximate and non-binding.

Despite thorough checks of the contents, we cannot exclude possible printing and/or translating errors.

This catalogue does not constitute contractual documentation.

For the above reasons, all information relating to the specifications and equipment of each model must be requested prior to purchase from the dealer, who, as the sole contact person, will confirm or correct the data published by updating the customer on the characteristics and actual equipment of the relevant vehicle being negotiated.

Any reproduction, including in part, of the text or of the content of this document is prohibited.

The indicated weights are exclusively approximated. Tolerances of +/-5 % are allowed.

Generally speaking, special equipment and options increase the no-load weight and entail a reduction in the payload.

We hereby decline any and all responsibility in case structural changes are made to the vehicle; any assembly, disassembly or changes carried out by unauthorised workshops may jeopardise your safety and cause the warranty clauses to be forfeited.

For additional information on installation and technical details, please contact one of our dealers.
