

elnagh

For 60 years, Elnagh has been creating, innovating and redesigning the concept of movement. From the flexible fork for motor driven bicycles to the motorhome, Elnagh expresses all its exquisitely Milanese ingenuity with the same creativity that characterizes fabrics from the Eden of fashion. With one of the largest fleets circulating in Europe, Elnagh is the best known brand on the road and in campgrounds.

Elaborate words are no longer needed to describe it because each of its products contains everything that has always distinguished the brand and its history: inventiveness, determination and engineering.

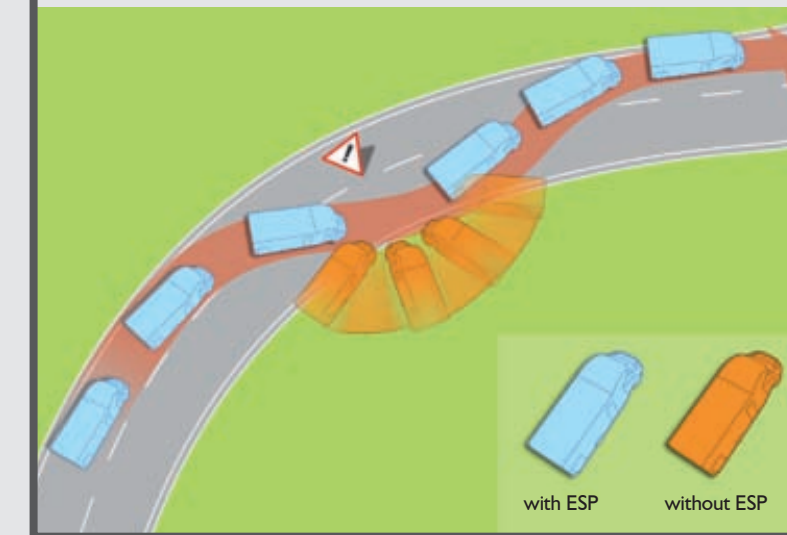

Thanks to its youthful inventors, skilled artisans, project technicians and designers, Elnagh is a company one step ahead of the game, offering elegant and functional solutions with an attention to detail that only solid experience can offer. Marco Polo was familiar with precious fabrics, Michelangelo was a master artist, Christopher Columbus studied sea routes. Elnagh creates campers. An Elnagh camper is a jewel of precision and comfort.

RANGE BARON

Baron

Elnagh welcomes you into the family.

If you have never climbed into an Elnagh camper, Baron is the one for you. Baron is the perfect camper for those who want to grab their bags and set off without any limitations. Baron is warm if you want to travel northwards and cool if you prefer to head south. It is comfortable in the winter and a pleasant refuge from the heat in the summer. Elnagh has already thought of everything, you just have to turn the key.

Control panel on entry door with master switch.

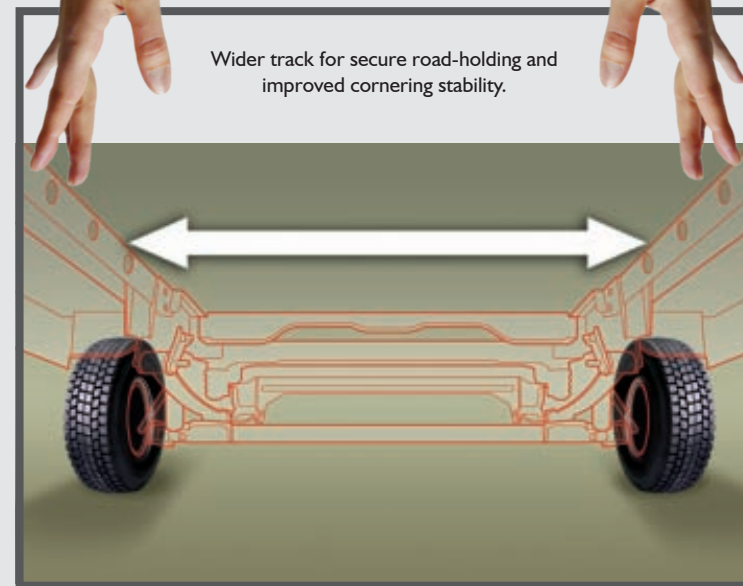

Spacious garage and horizontal rear lights for greater visibility.

Functional hob with three burners and glass cover.

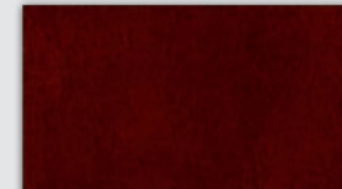

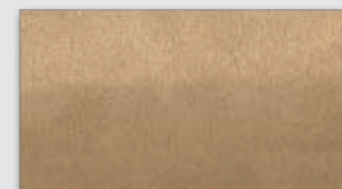

Wider track for secure road-holding and improved cornering stability.

STANDARD AND OPTIONAL EQUIPMENT ON ALL ELNAGH MODELS

STANDARD EQUIPMENT: STRUCTURE

FLOOR

Thickness: 70 mm specially projected to achieve high thermic and acoustic isolation High results in strength and torsional performances.

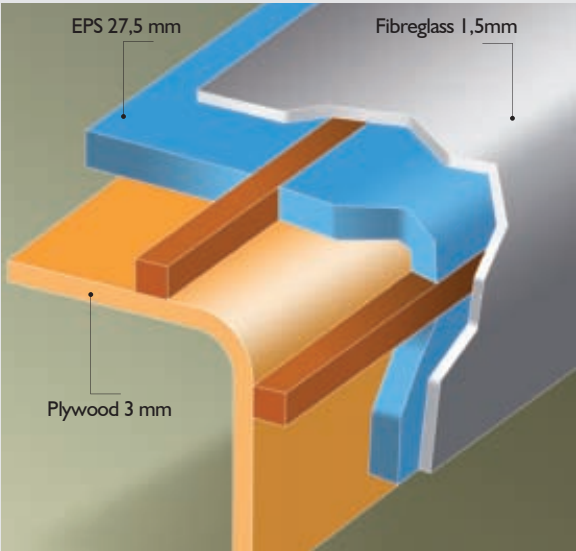

FIBREGLASS COATED WALLS AND ROOF

The materials combination used in the walls and roof production leads to the best results in terms of thermic and acoustic comfort as well as in terms of easy repair.

The performance offered by the fibreglass is higher then the use of aluminium in which case the transmission level of heat, noise and cold is higher than when using the fibreglass. Advanced technology for the body and shell. Technical specifications of our all-composite shells:

- ◉ Resist mould and mildew
- ◉ Water-repellent
- ◉ Withstand high mechanical loads
- ◉ Fire and acid resistant
- ◉ May be used in temperatures between 50°C and + 100°C
- ◉ Crush-proof
- ◉ Provide added insulation

ALL CALCULATIONS OF THE MASSES MENTIONED IN THIS CATALOGUE ARE MADE ACCORDING TO THE EUROPEAN DIRECTIVE 95/48 CE AND TO THE EUROPEAN NORM EN 1646 – 2 STANDARD.

TOTAL MASS IN RUNNING ORDER

It includes: base vehicle's weight (empty), driver, fuel, lubricants, cooling fluids, tools, gas bottles, fresh water tank. Some models have a clear waters load limitation (see label on loading point).

MAX PAYLOAD

Difference between the maximum technically admitted laden mass and the mass in running order. It includes: passengers' weight excluded the driver, luggage and personal belongings. All masses and weights are subject to a tolerance of +/- 5% complying with the European Directive 95/48/CE. The installation of optionals or additional equipment reduces the maximum payload of the vehicle accordingly. The total mass in running order indicated in this catalogue refers to the standard basic vehicle and it excludes the weight of any optional equipment.

In case of installation of additional overhanging appendixes such as towing hook or motorbike carrier the number of homologated places may vary depending on the specific circulation laws of each single country. The drinking water installation fits the state of the art of the technique 03/2009 (Law 2002/72/EEC).

SEA S.P.A. – Elnagh reserves the right to modify, without any prior notice, the technical features and any other specification of its product range; all data included in present catalogue are to be considered indicative and not binding.

STANDARD EQUIPMENT: BODY

- ◉ Warm air ventilation in overcab (coachbuilt models)
